# Water production

«Econia» is an innovative company on production and distribution of drinking water and baby food with high-tech equipment, modern production lines, highly qualified staff that produces products of the highest quality.

## Production capacities:

- ❖ Production capacities of company «Econia» provide production of drinking water in quantities, required by the customer.

Water is produced in two specialized workshops:

- ❖ Small units production line – 0,33 l, 0,5 l, 2,0 l, 1,5 l.
- ❖ Big units production line – 5,0 l, 6,0 l.

## Quality control

The quality control of food begins long before the production stage - strictly controlled are not only vegetables, fruits, berries and grains, but even the soil in which they grew up.

Production is equipped with modern internationally accredited laboratory that provides quality control and safety at all stages of production.

- Econia has successful and fruitful experience in production and distribution of baby food and drinking water.
- Modern plant, certified as baby food and water production.
- Econia successfully realizes Private Label projects and has highly client-oriented approach.

## Baby water

**Health of your baby begins from water which it gets from the first days of its life. That is why we created a unique product – special baby water with balanced mineral composition that:**

- ❖ Has scientifically based unique formula developed by the leading experts of water resources and is based on longterm clinical researches.
- ❖ Is fundamentally different from drinking water for adults in composition and level of mineralization – protects the baby's body from salt stress, facilitates digestion and strengthens the immune system of the baby.
- ❖ Has a perfectly balanced composition of macro and micronutrients necessary for the proper metabolic processes in the body of mother and baby.
- ❖ Does not require boiling before drinking as well as for preparation of instant infant formula and instant cereals (it is necessary only to warm it up to 50°C), thus preserving the chemical composition of the mixture and providing the baby with all the necessary minerals and nutrients.
- ❖ Recommended for pregnant women, breastfeeding women and babies from the first days of life.
